Notes

Guild: a group of birds sharing the same general habitat type or needs

Species in Bold: habitat obligates, generally restricted to one habitat for breeding

Relative Density: score for density in BCR 13 relative to other BCRs, 5 = near maximum, 1 = <1% of maximum

Pop'n Trend: score for rate of Population Decline. 5 = ≥50% decline over 30 years, 1 = significant increase

Threat Score: estimated threat to future conditions, 5 = conditions likely to be much worse, 1 = likely to improve

Priority Tier - from Species Assessment; "--" indicates a species not assigned to a priority Tier
