Notes

Priority Tier - explains reason for placing a species in the Priority Species pool in this BCR, using PIF assessment scores and criteria.

Continental Watch List/Stewardship Species - species of continental importance as in PIF North American Landbird Conservation Plan 2004

Species - listed species in parentheses (E=Endangered, T=Threatened, S= Special Concern), by jurisdiction (CA =Canada, ON =Ontario).

Total PIF Score - Sum of PIF vulnerability scores in columns H (RD) through M (PS)

%Pop /% Global Pop'n - estimated percent of world population of this species breeding or wintering in BCR 13

RD_B Relative Density - score for density in BCR 13 relative to other BCRs, 5 = near maximum, 1 = <1% of maximum

PT13 Pop'n Trend - score for rate of Population Decline. 5 = $\geq 50\%$ decline over 30 years, 1 = significant increase

TB13 Threats Breeding - score for estimated threat to future conditions, 5 = conditions likely to be much worse, 1 = likely to improve

BD Global Br. Distribution - score for size of breeding range size; 5 = range restricted, 1 = very widely distributed

PS Global Pop'n Size - estimated size of world breeding population, scored by order of magnitude; 5 =<50,000, 1=>50,000,000
