

PIF Priority Species for BCR 13 Ontario (May 2004)

Species	Relative Density	Pop'n Trend	Threat Score	Priority Tier
Short-eared Owl	2 *	5	4	I.A.
Red-headed Woodpecker	2	5	4	I.A.
Willow Flycatcher	5	2	2	I.A.
Wood Thrush	4	4	3	I.A.
Blue-winged Warbler	4	3	2	I.A.
Golden-winged Warbler	3	3	3	I.A.
Prairie Warbler	2	3	3	I.A.
Cerulean Warbler	3	4	3	I.A.
Canada Warbler	2	5	3	I.A.
Henslow's Sparrow	3	5	4	I.A.
Swamp Sparrow	5	4	2	I.B.
Northern Harrier	4	4	4	II.A.
Northern Saw-whet Owl	2	5	3	II.A.
Whip-poor-will	2	5	3	II.A.
Field Sparrow	3	5	3	II.A.
Eastern Meadowlark	4	5	3	II.A.
Black-billed Cuckoo	5	5	2	II.B.
Belted Kingfisher	5	4	2	II.B.
Northern Flicker	5	5	2	II.B.
Bank Swallow	5	4	3	II.B.
Rose-breasted Grosbeak	5	3	2	II.B.
Bobolink	5	4	3	II.B.
Baltimore Oriole	5	4	2	II.B.
Northern Bobwhite	1	5	4	III.A.
Red-shouldered Hawk	2	3	3	III.A.
Peregrine Falcon	1	1	3	III.A.
Barn Owl	1	3	3	III.A.
Acadian Flycatcher	2	3	3	III.A.
Loggerhead Shrike	1	5	5	III.A.
Kirtland's Warbler	1	5	4	III.A.
Prothonotary Warbler	1	4	3	III.A.
Louisiana Waterthrush	2	4	3	III.A.
Hooded Warbler	2	1	3	III.A.
Yellow-breasted Chat	1	5	3	III.A.
Bald Eagle	1	1	3	III.B.
Chimney Swift	3	5	3	III.C.
Brown Thrasher	3	5	3	III.C.
Eastern Towhee	2	5	3	III.C.
Vesper Sparrow	2	5	3	III.C.
Grasshopper Sparrow	2	5	3	III.C.

Notes

Relative Density: score for density in BCR 13 relative to other BCRs, 5 = near maximum, 1 = <1% of maximum

* relative density scores are for breeding season; winter score for Short-eared Owl is 5

Pop'n Trend: score for rate of Population Decline. 5 = $\geq 50\%$ decline over 30 years, 1 = significant increase

Threat Score: estimated threat to future conditions, 5 = conditions likely to be much worse, 1 = likely to improve

Priority Tier - from Species Assessment
